in 2017 with funding from

This project is made possible by a grant from the Institute of Museum and Library Services as administered by the Pennsylvania Department of Education through the Office of Commonwealth Libraries

## TRUSTEES.

---

REV. GEORGE E. PIERCE, S. T. D., PRESIDENT.

REV. JOHN SEWARD, *Aurora*.

REV. CALEB PITKIN, *Hudson*.

REV. HARVEY COE, *Hudson*.

REV. BENJAMIN FENN, *Southington*.

HARMON KINGSBURY, Esq., *Cleveland*.

TIMOTHY ROCKWELL, Esq., *Painesville*.

REV. SAMUEL C. AIKIN, S. T. D., *Cleveland*.

HON. ELISHA N. SILL, *Cuyahoga Falls*.

HARVEY BALDWIN, Esq., *Hudson*.

REV. EVERTON JUDSON, *Milan*.

DARIUS LYMAN, Esq., *Ravenna*.

CORTLAND L. LATIMER, Esq., *Norwalk*.

---

TREASURER AND RECORDING SECRETARY,  
SILAS T. LADD, Esq.

FINANCIAL AGENT,  
JACKSON J. BUSHNELL, A. M.

# FACULTY AND INSTRUCTORS.

---

REV. GEORGE E. PIERCE, S. T. D.,  
PRESIDENT.

JOHN DELAMATER, M. D.,  
*Professor of Midwifery and Diseases of Women and Children.*

JARED P. KIRTLAND, M. D.,  
*Professor of the Theory and Practice of Physic.*

REV. ELIJAH P. BARROWS, A. M.,  
*Professor of Sacred Literature.*

REV. CLEMENT LONG, A. M.,  
*Professor of Christian Theology.*

REV. HENRY N. DAY, A. M.,  
*Oviatt Professor of Sacred Rhetoric.*

NOAH WORCESTER, M. D.,  
*Professor of General Pathology and Physical Diagnosis.*

HORACE A. ACKLEY, M. D.,  
*Professor of the Principles and Practice of Surgery.*

JOHN L. CASSELS, M. D.,  
*Professor of Materia Medica, Pharmacy and Botany.*

SAMUEL ST. JOHN, M. D.,  
*Professor of Chemistry, Natural History and Medical Jurisprudence.*

NATHAN P. SEYMOUR, A. M.,  
*Professor of the Latin and Greek Languages.*

JAMES NOONEY, A. M.,  
*Professor of Mathematics and Natural Philosophy.*

JACOB J. DELAMATER, M. D.,  
*Professor of Anatomy and Physiology.*

ROBERTSON H. SHELDON, M. D.,  
*Demonstrator of Anatomy.*

CUYLER LEONARD, A. B.,

*Tutor in Mathematics.*

RUFUS NUTTING, A. B.,

*Tutor in Latin and Greek.*

ELEROY CURTIS, A. B.,

*Instructor in the Preparatory Department.*

LEMUEL BISSELL, A. B.,

*Instructor in the Preparatory Department.*

KARL RUGER,

*Instructor in Modern Languages.*

## **EXAMINING COMMITTEE.**

HON. JOHN R. OSBORN, *Norwalk.*

REV. MILLS GILLETT, *Painesville.*

REV. BENJAMIN FENN, *Southington.*

HENRY C. KINGSLEY, Esq., *Cleveland.*

REV. ALEXANDER DUNCAN, *Newark.*

EBENEZER ANDREWS, Esq., *Milan.*

DARIUS LYMAN, Esq., *Ravenna.*

JAMES S. CARPENTER, Esq., *Medina.*

REV. NEWTON BARRETT, *Brecksville.*

## **MEDICAL CENSORS.**

PETER ALLEN, M. D., *Trumbull Co.*

AQUILA TOLLAND, M. D., *Madison Co.*

THOMAS O. EDWARDS, M. D., *Fairfield Co.*

JAMES HENDERSON, M. D., *Richland Co.*

D. D. EVANS, M. D., *Summit Co.*

## THEOLOGICAL STUDENTS.

NAMES.	YEAR.	RESIDENCE.	ROOMS.
Henry Balch,	2nd,	<i>Harwinton, Ct.</i>	12 N.

## COURSE OF INSTRUCTION, EXPENSES, &amp;c.

IN

## WESTERN RESERVE COLLEGE.

---

 TERMS OF ADMISSION.

Candidates for admission to the Freshman Class are examined in English Grammar, Geography, Arithmetic, Andrews and Stoddard's Latin Grammar, Andrews' Latin Exercises, Cicero's Select Oration, Sallust, Virgil, Sophocles' Greek Grammar, the Four Gospels, and Jacob's, Colton's or Felton's Greek Reader. Some previous acquaintance with Algebra and Geometry will greatly facilitate the student's progress, but it is not indispensable.

A candidate for an advanced standing, in addition to the above studies, is examined in the various branches to which the class which he proposes to enter has attended.

The stated times for the examination of candidates for admission are the Monday preceding Commencement and the last day of the vacation immediately following.

No one can be admitted to the Freshman Class till he has completed his fourteenth year, nor to an advanced standing, without a proportionate increase of age.

Satisfactory testimonials of good moral character are required, and those who are admitted from other colleges must produce certificates of dismission in good standing.

Having passed a satisfactory examination and paid the tuition for one term, students are admitted on probation, and receive from the President a copy of the laws of the College and a certificate of admission. After a residence of one term, those who have sustained

an unblemished moral character, and have given the Treasurer satisfactory security for the payment of their term bills, are admitted to matriculation and become regular members of College.

A thorough acquaintance with the studies required for admission is indispensably necessary, in order to receive the full advantage of the College course. It is found by experience, that students imperfectly prepared for the class they enter, are embarrassed in their future progress, and are seldom able to repair the want of preparatory study.

## COURSE OF INSTRUCTION.

### FRESHMAN CLASS.

- I. { Xenophon's *Cyropædia*.  
Livy.  
Davies' *Geometry*, five books.
- II. { *Cyropædia*, continued through five books.  
Livy, continued through five books.  
Geometry, continued through nine books.  
Davies' *Algebra*, commenced.
- III. { Homer's *Iliad*.  
Horace.  
Algebra, continued to chapter fifth.

### SOPHOMORE CLASS.

- I. { *Iliad*, continued through eight books.  
Xenophon's *Memorabilia*, begun.  
Cicero de *Officiis*.  
Algebra, finished.  
Application of Algebra to Geometry.  
Plane Trigonometry.  
History.
- II. { Xenophon's *Memorabilia*.  
Horace.  
Cicero pro *Cluentio*.  
Spherical Trigonometry.  
Mensuration of Surfaces and Solids.  
Davies' *Surveying and Navigation*.
- III. { Plato's *Gorgias*.  
Cicero de *Oratore*.  
Davies' *Analytical Geometry*.

## JUNIOR CLASS.

- I. { Tacitus; Agricola, Manners of the Germans, and two books of the History.  
 { Oration of Demosthenes on the Crown.  
 { Church's Differential and Integral Calculus.
- II. { Quintilian, four books.  
 { Woolsey's select Greek Tragedies, viz: the Antigone and Electra of Sophocles, the Alcestis of Euripides, and the Prometheus of Æschylus.  
 { Olmsted's Natural Philosophy; Mechanics.
- III. { Greek Tragedies, finished.  
 { Whately's Logic.  
 { Olmsted's Natural Philosophy; Hydrostatics, Pneumatics, Acoustics and Optics.  
 { Paley's Natural Theology.  
 { Paley's Evidences of Christianity.

## SENIOR CLASS.

- I. { Olmsted's Natural Philosophy; Electricity, Magnetism, Galvanism, and Electro Magnetism.  
 { Olmsted's Astronomy.  
 { Stewart's Elements of Intellectual Philosophy.  
 { Cousin's Psychology.  
 { Chemistry.
- II. { Olmsted's Astronomy, with Mason's Supplement, completed.  
 { Crystallography.  
 { Shepherd's Mineralogy.  
 { Conchology.  
 { Lieber's Political Ethics.
- III. { Geology.  
 { Botany.  
 { Philosophy of Natural History.  
 { Anatomy and Physiology.  
 { Zoology.  
 { Story on the Constitution.  
 { Wayland's Political Economy.  
 { Butler's Analogy.  
 { Whately's Rhetoric.

Besides the recitations in Natural Philosophy and Astronomy, a course of Lectures is commenced in the third term of the Junior year, the design of which is to furnish experimental illustrations, and to supply deficiencies in the text books. It embraces the general principles of Mechanics, Hydrostatics and Pneumatics; the theory of Musical Vibrations; a full exhibition of the phenomena of polarized and unpolarized Light; the principles of Electricity, Magnetism, Galvanism, and Electro-Magnetism; and the most important facts and principles in Meteorology and Astronomy. The whole is embraced in about fifty lectures. Apparatus recently pur-

chased in London and Paris, at an expense of over four thousand dollars, furnishes ample means of illustration. The Astronomical Observatory recently erected, contains an Equatorial Telescope, made by Simms of London, with a focal length of five and a half feet, and an aperture of four inches. The right ascension and declination circles are each ten inches in diameter, reading by verniers, the former to single seconds of time, and the latter to ten seconds of arc. It has a large assortment of eye pieces and a position micrometer. The Observatory contains also a Transit Circle by the same maker. It has a telescope of thirty inches focus, and an aperture of nearly three inches. The circle is eighteen inches in diameter, graduated on platina to five minutes, having three fixed microscopes, each reading to single seconds. The clock was made by Molineux of London, has a mercurial pendulum, and is found to be very little affected by changes of temperature. A part of the regular instruction of the Senior class in Astronomy consists in an explanation of the construction and use of these instruments, and an exhibition, through the telescope, of the most prominent objects in the heavens.

Instruction is given in Chemistry, Mineralogy and Geology, by recitations from text books, accompanied by theoretical and experimental lectures. Additions have been made to the Chemical apparatus which will greatly facilitate the illustrations of that science. A collection of fifteen hundred choice Mineralogical and Geological specimens, selected with great care, has been obtained, and is so arranged as to exhibit the important relations of all the species. A large proportion of the specimens are from Europe and other foreign localities. The collection also embraces a suit of fossils obtained from Berlin, illustrating a very interesting geological epoch.

The members of the three lower classes exhibit specimens of translation or English composition, each, once in three weeks. The Senior Class write frequently on topics connected with their course of study. There is a Rhetorical exercise in the Chapel every week before all the members of the College, in which every student will share in his turn.

On the morning, afternoon and evening of the Sabbath, the students attend religious worship with the Faculty in the Chapel, unless permission has been given to worship with some other society ; and

morning and evening prayers are attended through the week. A familiar acquaintance with the Scriptures, and a thorough knowledge of the Christian system, together with the cultivation of the moral affections, are deemed an important part of a liberal education ; and efforts are made to secure both a speculative and practical acquaintance with the religion of the Bible.

There is an examination of all the College classes at the close of the first and second terms, on the studies of those terms.

The Freshman, Sophomore and Senior classes are examined at the close of the third term, on all the studies of the previous year ; and the Junior class, on all the studies of the previous course.

A lecture is delivered once in three weeks, before all the students, on some subject pertaining to literature, science or practical ethics, designed to promote good order, decorum, and a spirit of study among the students.

The Libraries of the College and the Literary Societies contain about six thousand volumes.

### Modern Languages.

Instruction in the German, French, Spanish and Italian languages is given to those students who desire it, on very reasonable terms, by Mr. Ruger, a native of Germany.

### Expenses.

Tuition,	-	-	-	-	-	-	\$30,00
Room Rent,	-	-	-	-	-	-	6,00
Contingencies,	-	-	-	-	-	-	3,50
Use of Library,	-	-	-	-	-	-	1,50
Amount of Charge,							<hr/> \$41,00

Board may be obtained in good families at \$1,25 a week, or \$50 a year, not including vacations. To those who associate and furnish their own provisions, the price has been from 75 cents to a dollar a week.

Wood may be obtained at \$1 or \$1,25 a cord. Students provide

for themselves the furniture of their rooms, lights, washing, books and stationery.

It is estimated that the whole annual expense of the student, exclusive of apparel and traveling expenses, need not much exceed \$100.

### Fund for the Indigent.

The Faculty are authorized to remit the tuition of pious young men who have the work of the Ministry in view, and possess industrious and economical habits. The College seeks the influence of such young men within its walls, and the churches need their labors as soon as they can be fitted for their work, and their education fulfils the design for which the Institution was founded.

Pious young men preparing for the Ministry may receive aid from the American Education Society.

### Terms and Vacations.

The Terms and Vacations for the present year are,

From Sept. 24th, a Term of 14 weeks,

“ Dec. 31st, a Vacation of 2 weeks,

“ Jan. 14th, a Term of 14 weeks,

“ April 22nd, a Vacation of 4 weeks,

“ May 20th. a Term of 12 weeks.

Commencement, August 12th. 1846.

It is highly important that students should return to College in time to attend the first recitations or lectures of their respective classes, since an absence of a few days at a time when a new branch of study is commenced, seldom fails to embarrass the whole course, and in some cases it is impossible to make up the loss.

### Preparatory Department.

The studies of this department are pursued in five classes, as follows :

English Class,	{	English Grammar.
		Arithmetic.
		Geography.
		Algebra.

1st Latin Class,	{ Andrews' Latin Grammar and Reader. Andrews' Latin Exercises. Virgil, begun.
2nd Latin Class,	{ Virgil, finished. Sallust. Cicero's Orations.
1st Greek Class,	{ Sophocles' Greek Grammar. Sophocles' Greek Lessons. Jacobs' Greek Reader.
2nd Greek Class,	{ Greek Reader finished. Greek Testament.

Declamation and composition throughout the year.

Regular hours of study and recitation are observed, and morning and evening prayers in the Chapel and worship on the Sabbath are attended.

By the payment of fifty cents a term, access may be obtained to the College Library.

Public examinations are held at the same time as in the College.

Those who are admitted to this department must sustain a good moral character, and have attained to twelve years of age. No one is permitted to receive a room or attend recitations till he has paid in advance to the Treasurer of the College the amount of one term bill. Tuition must afterwards be paid in advance, or satisfactory security given. Students may enter any class which they are prepared to join. No one can be received for a shorter period than a term; and in subsequent terms, no abatement from charges is made on account of absence for a period less than half a term.

The charge for tuition in this department is \$20 per annum; and for room rent \$6. There is necessarily a small additional expense for contingencies. Other expenses will vary with circumstances and the habits of the student. Text books can be obtained in Hudson at a small advance on their cost in Eastern bookstores.

MANUAL LABOR, either on the College lands or in the employment of those connected with the College, can be had to occupy the student's vacant hours, and afford him healthful exercise as well as a valuable profit. Regular, industrious young men may earn eight cents an hour, \$1 a week or \$40 a year.

## THEOLOGICAL DEPARTMENT.

---

### COURSE OF STUDY.

I. *Sacred Literature*—including the Hebrew language, the Greek of the Septuagint and New Testament, Archæology, Principles of Interpretation, and Exegetical Study of the Scriptures.

II. *Ecclesiastical History*—including Sacred Chronology, Geography, Church Polity and Missions.

III. *Systematic Theology*—including Mental Philosophy, Moral Philosophy, Natural Theology, Revealed Theology and Positive Institutions.

IV. *Rhetoric*—including Composition and Delivery of Sermons and Pastoral Theology.

---

Instruction is given by the President in Ecclesiastical History, and in the other branches by the appropriate Professors. A full and thorough course of Theological instruction is provided, so arranged as to occupy three years, and designed to prepare young men for the greatest efficiency in the ministry.

Every person admitted to the course must evince hopeful piety, be in communion with some church of Christ and have graduated at some regular college, or otherwise have qualified himself for pursuing advantageously the prescribed course of study.

The proper time for entering the department is at the commencement of the first term of the College year, and the vacations are the same as in the College.

Theological students may have access to the lectures of the collegiate course, free of expense.

No charge is made for tuition or for rooms. Furniture is also provided free of charge; and arrangements have been made for defraying the expense of board, in cases of need, to the amount of thirty dollars per annum.

## MEDICAL DEPARTMENT.

---

The immediate supervision and financial concerns of the Medical Department, established in the city of Cleveland, are intrusted to the following

### BOARD OF AGENCY.

LEONARD CASE, Esq.	J. M. WOOLSEY, Esq.
P. M. WEDDELL, Esq.	HENRY B. PAINE, Esq.
PHILO SCOVILLE, Esq.	W. J. WARNER, Esq.
HON. JOHN W. ALLEN.	THOS. BOLTON, Esq.
HON. S. STARKWEATHER.	WILLIAM A. OTIS, Esq.
ZALMON FITCH, Esq.	JAMES M. HOYT, Esq.
MADISON MILLER, Esq.	

---

CHARLES STETSON, Esq.

Treasurer of the Board of Agency.

---

The following gentlemen constitute the Board of Instructors:

JOHN DELAMATER, M. D.,

Professor of Midwifery and Diseases of Women and Children.

JARED P. KIRTLAND, M. D.,

Professor of the Theory and Practice of Physic.

NOAH WORCESTER, M. D.,

Professor of General Pathology and Physical Diagnosis.

HORACE A. ACKLEY, M. D.,

Professor of Surgery.

JOHN L. CASSELS, M. D.,

Professor of Materia Medica, Pharmacy and Botany.

SAMUEL ST. JOHN, M. D.,

Professor of Chemistry and Medical Jurisprudence.

JACOB J. DELAMATER, M. D.,

Professor of Anatomy and Physiology.

ROBERTSON H. SHELDON, M. D.,

Demonstrator of Anatomy.

The annual Course of Lectures commences on the first Wednesday of November and continues sixteen weeks. The lectures are so arranged that at least six are given daily, except on Saturdays, when there are three. As the lectures on the different branches commence and proceed simultaneously, it is eminently desirable that students, whether designing to attend a part or the whole of the branches taught, make their arrangements to commence with the opening of the term.

The large and valuable Museums of Special and Morbid Anatomy owned by Professor Ackley, have, by donation from that gentleman, become the property of the Medical School. In Anatomy and Physiology all the recent discoveries are demonstrated, and their practical application illustrated. A large and elegant collection of paintings and colored plates illustrative of pathological and topieal Anatomy, diseases of the skin, veins, &c., mounted and displayed in such a manner as to be accessible to the class, furnish the department of Pathoiogy; while a suite of specimens of substances used for remedial purposes, together with a set of enlarged colored drawings designed to illustrate the structure of the Artificial and Natural systems of classification, afford ample means for the elucidation of Materia Medica and Botany.

The Chemical Course is rendered full and effective by the extent and completeness of the apparatus, which is adequate to the demonstration, not only of the principles of Chemistry proper, but also of Caloric, Light, Electricity, Galvanism, Magnetism, Electro-Magnetism, Pneumatics, &c. The course of Medical Jurisprudence embraces thorough instruction in Toxicology.

Access to a library, consisting of about 1000 volumes, is enjoyed by students during their attendance on the Lectures.

The principles of Operative Surgery are exemplified by the aid of a large collection of instruments and apparatus appropriate to that branch. As surgical operations are performed *gratuitously* in the presence of the class, it is believed that there are few Medical Institutions in the country where the principles of Surgery are more fully taught with their application to successful practice, than at this.

Provision is made for the prosecution of Practical Anatomy on the most liberal terms.

A large and splendid collection of specimens illustrative of Zool-

ogy, Ornithology, Conchology, &c., will be open, under suitable regulations, to the Medical Class; and courses of Lectures on Geology and select topics of Natural History are given so far as time may allow and the wishes of the Class suggest.

A building has been erected the present year, which furnishes ample accommodations for Lectures and the display of the Anatomical Museum, Cabinets of Natural History, &c.

Each student is expected early in the term to register his name, place of residence and the name of the practitioner with whom he has pursued his medical studies, in the Matriculation Record. Previous to receiving the tickets of the several Professors, a certificate of Matriculation will be required, the fee for which is \$3.

It is expected that the tickets of the several Professors will be taken or arranged for, during the first two weeks of the term. Each student is advised to provide himself with a Medical Lexicon, and some good modern treatise on each of the branches to which he proposes to devote his attention.

The fee for the tickets of all the Professors is \$50. When desired, a promissory note payable in twelve months, for fifty six dollars, and signed jointly with some responsible person, will be received in place of money at the time.

Medical Graduates and those who have attended two full courses at this Institution, are entitled to free admission to all the Lectures, by paying the matriculation fee only.

Good board, including room, lodging, fuel and light, may be obtained at prices varying from \$1,50 to \$2,00 per week. Every facility for self-boarding may be obtained at moderate cost.

### Graduation.

The candidate for the degree of Doctor of Medicine must have pursued medical studies for three years—attended two full courses of Medical Lectures, one of which must have been at this institution—composed and deposited with the Dean, at least three weeks previous to the close of the Lecture term, a satisfactory Thesis on some medical subject, together with the sum of \$20,00 as a Graduating Fee—the Thesis and Graduating Fee to be returned to him in case he fail of obtaining the degree. He must also produce satisfactory testimonials of good moral character, and sustain him-

self in an examination by the Professors, in the presence of the Censors; a majority of the votes given in a joint ballot of the Professors and Censors being necessary to his recommendation for a degree. Gentlemen who have been reputably engaged in the practice of medicine for four years may be admitted to an examination for the degree, after having attended a single course of Lectures, provided only that all other pre-requisites have been complied with, as in similar applications of medical students. The Medical Degrees are conferred by the President and Trustees of the Western Reserve College, in Cleveland, on the Wednesday following the close of the Lecture term; and in Hudson at Commencement in August.

### Private Course.

A course of Instruction consisting of lectures and recitations in all the branches of Medicine will be given during the summer by the professors resident in Cleveland.

The following books are particularly recommended: Wilson's Anatomy, Carpenter's Physiology, Ferguson's Surgery, Eberle's Practice, Pereira's Materia Medica, Churchill's Midwifery, Churchill on Diseases of Females, Condie on Diseases of Children, and Graham's Chemistry. Any other modern work on each of the branches will answer.
